-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION*****Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 4, 7 and 11 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-13 of U.S. Patent No. 6,552,449 B2 (Tsuboi et al. ) in view of Takei 5,530,303 (of record). Tsuboi et al. claims a position control stage with a turntable supported for rotation, three armature windings and five field magnets but does not claim winding turns in a flat rectangular loop or flat field magnets. Takei '303 discloses flat rectangular windings and flat field magnets in figure 3. Since Takei and Tsuboi et al. are from the same field of endeavor it would have been obvious at the time the invention was made for one of ordinary skill in the art to have utilized flat rectangular loop windings and flat field magnets in order to increase the power provided by the motor.

In regard to claim 4 see Tsuboi et al. claim 6.

In regard to claim 7 see Tsuboi et al. claim 12.

In regard to claim 11, see Tsuboi et al. claim 4.

***Allowable Subject Matter***

Art Unit: 2834

Claims 5, 6, 8-10 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record does not disclose or teach field magnets disposed on the disc surface of a turntable and armature windings on the disc surface of a bed in combination with the other features of claims 5 and 6. The prior art of record does not disclose or teach an origin mark on the turntable in combination with the other features of claim 8. The prior art of record does not disclose or teach a stopper below the turntable in combination with the other features of claim 9. The prior art of record does not disclose or teach an opening for looking into the interior to form a circular support in combination with the other features of claim 10. The prior art of record does not disclose or teach a power line, a sensor line and a signal line clumped together through a cord cover in combination with the other features of claim 12.
